Supply artwork either to size or 25% scale.

Keep all text at least 5mm away from the edges of any print.

Clipping Masks

Clipping masks can be used to crop down artwork, but should not be used as a substitute for removing unnecessary text, images or lines in artwork. Using this method to hide unnecessary pieces of artwork can result in large files that risk corruption. It is better practice to manually remove unnecessary sections of artwork to preserve the size and stability of the file.

Cutlines / Creaselines

Cutlines and creaselines must be on separate layers.
Lines must be complete vector paths set to (0.25mm).
Set the vector paths to colours that are not in the artwork.
